IV. Conclusion (summary)

Having a skincare routine before and after makeup is very important. The cleanse removes impurities, oils, preventing them from clogging your pores in my case I use the Cerave. This helps to protect your skin from breakouts and keeps your face fresh. The moisturizer helps hydrating the skin and this provides a smooth base for makeup application and prevents it from settling into dry patches or fine lines. I use moisturizer from Bubbles and Glow recipe. The bubbles moisturizer helps you to provide light weight, shine, free hydration, leaving your complexion feeling hydrated, comfortable and fresh. The Glow recipe moisturizer instantly hydrates and refreshes skin. This moisturizer is 100% oil free. After the moisturizer you apply the SPF, which is the most important to me, forms a protective barrier on your skin's surface to help reflect the sun's UVA and UVB rays without irritating sensitive skin. Last product is the primer, I use the NYX primer named Plumb Right Back. This primer moisturizes the skin for a plumb, radiant look, extends the wear of foundation and concealer all day, helps smooth skin for an even makeup application and absorbs quickly leaving your skin primer and easy for makeup application.
